MCIS Spring 2025 Graduate Student with 2+ years of full-stack and UX/UI experience. Skilled in React, Node.js, Flutter, and AI integrations. Seeking Spring 2026 software development internship to apply technical expertise in real-world product development.

Education

Youngstown State University

M.S. in Computing and Information Systems (Ongoing GPA-3.70)

Ohio, United States

Expected Graduation: Dec 2026

KNS Institute of Technology

B.E. in Computer Science and Engineering (GPA-3.2)

Bangalore, India

Graduation Date: Aug 2021

Technical Skills

Languages: JavaScript, Python, HTML/CSS, SQL, ABAP, Dart **Frameworks/Libraries:** React, Node.js, Flutter, Next.js, express.js, electron.js **Databases:** MongoDB, MySQL, PostgreSQL **Tools & Platforms:** Git, VS Code, Figma, Vercel, Render, Firebase **APIs & Integrations:** REST APIs, GraphQL, OpenAI API, Anthropic API, DeepSeek API, Ollama Models, Strapi CMS **Operating Systems:** Windows, macOS, Linux

Experience

Graduate Student Web Developer

Youngstown State University

Youngstown, OH

March 2025 – Present

- Led development of a dynamic events calendar for Cliffe College of Creative Arts using Drupal, HTML, CSS, and JavaScript; introduced modern UI components and responsive rendering.
- Optimized performance and resolved critical issues on Dana School of Music & Theatre websites, reducing page load times and improving accessibility for faculty and students.

Education & AI Integration Specialist

Haicam Technologies

Remote, NSW, Australia

April 2024 – Nov 2024

- Led AI research & integration initiatives for personalized learning platform, implementing course recommendations and automated evaluation systems that scaled from zero to 1,000+ global users.
- Collaborated remotely with the development team to integrate ByteBoss AI Agent for automated course building, Discord bot creation, and streamlined student onboarding workflows.

Information Architect

Dimension64 Consulting

Bangalore, India

Jan 2023 – Aug 2024

- Designed information architecture and visual interfaces for Bunde fleet management platform, creating mobile and web app schemas, user workflows, and dashboard hierarchies using Figma and Adobe XD.
- Led UX prototyping and client interactions to define information structures, conducting design reviews and stakeholder discussions to optimize data organization and user experience across all touchpoints.

Developer

Maventic Innovate Solutions

Bangalore, India

July 2021 – Nov 2022

- Developed SAP ABAP programs and forms, writing custom business logic and SQL queries for enterprise resource planning systems and data processing workflows.

Projects

JuniorIT – AI coding Platform & Learning (Haicam Technologies)

[Playground](#) | [Visual code Extension Live](#)

- Built AI-powered coding ecosystem with course builder, VS Code extension, and Discord bot integration using OpenAI, Claude, and DeepSeek APIs for automated learning and code assistance.

AttendForum – In-Class Attendance System (Youngstown State University)

[Demo Faculty](#) | [Student](#)

- Developed full-stack QR-based attendance platform using React dashboard and Node.js/MongoDB backend, deployed for 200+ users with real-time tracking capabilities.
